

CLAIMS:

What is claimed is:

5

1. A method of managing resource passwords, comprising:
identifying a plurality of resources that are part
of a group of resources;

updating a first password for a first resource in
10 the group of resources; and
updating a second password for a second resource in
the group of resources based on the updating of the first
password for the first resource.

15 2. The method of claim 1, wherein the first password
and the second password are the same.

3. The method of claim 1, wherein updating a second
password for a second resource in the group of resources
20 includes updating passwords for each of the resources in
the group of resources to be the same as the first
password.

4. The method of claim 1, wherein updating the first
25 password for a first resource is performed in response to
determining that the first password is about to expire.

5. The method of claim 1, wherein identifying a group
of resources includes retrieving a user password profile
30 in which groups of resources are identified along with
corresponding password information.

Docket No. AUS920010386US1

6. The method of claim 1, wherein identifying a group of resources includes:

providing a user with a listing of resources to which the user is given access;

5 receiving selections from the user for grouping various ones of the resources into groups of resources; and

storing the groups of resources in a user password profile.

10

7. The method of claim 6, wherein providing the user with a listing of resources includes providing the user with a display that indicates which of the resources may be grouped together.

15

8. The method of claim 6, wherein providing the user with a listing of resources includes providing the user with a display that indicates which of the resources are already grouped with one another.

20

9. The method of claim 6, further comprising:

storing a password in association with each of the groups of resources, wherein the password is used with each of the resources in a corresponding group of
25 resources.

25

10. The method of claim 1, wherein updating a second password for a second resource in the group of resources includes updating only selected ones of the resources in
30 the group of resources.

30

Docket No. AUS920010386US1

11. The method of claim 1, wherein updating a second password for a second resource in the group of resources includes:

- 5 prompting a user to change a password for one or more of the resources in the group of resources; and
 changing the password for the one or more resources selected by the user.

12. The method of claim 11, wherein the one or more
10 resources selected by the user includes all of the resources in the group of resources.

13. The method of claim 1, wherein the group of
resources is a group of resources each of which use the
15 same password to authenticate a user's access to the resource.

14. The method of claim 5, wherein the user password
profile is stored on a server.
20

15. The method of claim 5, wherein the user password
profile is stored on a client device.

16. The method of claim 5, wherein the user password
25 profile is distributed across the resources.

17. The method of claim 1, wherein updating the second password is performed automatically.

30 18. A computer program product in a computer readable medium for managing resource passwords, comprising:
 first instructions for identifying a plurality of

Docket No. AUS920010386US1

resources that are part of a group of resources;

second instructions for updating a first password
for a first resource in the group of resources; and

third instructions for updating a second password
5 for a second resource in the group of resources based on
the updating of the first password for the first
resource.

19. The computer program product of claim 18, wherein
10 the first password and the second password are the same.

20. The computer program product of claim 18, wherein
the third instructions for updating a second password for
a second resource in the group of resources include
15 instructions for updating passwords for each of the
resources in the group of resources to be the same as the
first password.

21. The computer program product of claim 18, wherein
20 the second instructions for updating the first password
for a first resource are executed in response to
determining that the first password is about to expire.

22. The computer program product of claim 18, wherein
25 the first instructions include instructions for
retrieving a user password profile in which groups of
resources are identified along with corresponding
password information.

30 23. The computer program product of claim 18, wherein
the first instructions include:

instructions for providing a user with a listing of

Docket No. AUS920010386US1

resources to which the user is given access;

instructions for receiving selections from the user for grouping various ones of the resources into groups of resources; and

- 5 instructions for storing the groups of resources in a user password profile.

24. The computer program product of claim 23, wherein the instructions for providing the user with a listing of
10 resources include instructions for providing the user with a display that indicates which of the resources may be grouped together.

25. The computer program product of claim 23, wherein
15 the instructions for providing the user with a listing of resources include instructions for providing the user with a display that indicates which of the resources are already grouped with one another.

20 26. The computer program product of claim 23, further comprising:

instructions for storing a password in association with each of the groups of resources, wherein the password is used with each of the resources in a
25 corresponding group of resources.

27. The computer program product of claim 18, wherein the third instructions for updating a second password for a second resource in the group of resources include
30 instructions for updating only selected ones of the resources in the group of resources.

Docket No. AUS920010386US1

28. The computer program product of claim 18, wherein the third instructions for updating a second password for a second resource in the group of resources include:

instructions for prompting a user to change a
5 password for one or more of the resources in the group of resources; and

instructions for changing the password for the one or more resources selected by the user.

10 29. The computer program product of claim 27, wherein the one or more resources selected by the user includes all of the resources in the group of resources.

30. The computer program product of claim 17, wherein
15 the group of resources is a group of resources each of which use the same password to authenticate a user's access to the resource.

31. An apparatus for managing resource passwords,
20 comprising:

means for identifying a plurality of resources that are part of a group of resources;

means for updating a first password for a first resource in the group of resources; and

25 means for updating a second password for a second resource in the group of resources based on the updating of the first password for the first resource.

32. A method of managing resource passwords, comprising:
30 identifying a plurality of resources that may be grouped together according to security parameters associated with the plurality of resources;

Docket No. AUS920010386US1

receiving a selection of two or more of the plurality of resources to be grouped together in a family or resources;

5 updating a first password for a first resource in the family of resources; and

updating a second password for a second resource in the family of resources based on the updating of the first password.
